ABOUT ME

I am a freelance developer with 3 years of experience creating custom web solutions and applications. I have worked on projects such as inventory management systems, financial management platforms, e-commerce applications, landing pages, and I am currently developing new applications based on the specific requirements of my clients. My focus is on delivering efficient solutions tailored to business needs.

WORK EXPERIENCE

Freelance projects
2022 – current
Management System - info
Technologies: Next JS – typescript – Prisma, Neon, clerk.
The platform allows you to generate detailed reports, view interactive graphs and receive real-time notifications. It is designed to optimize business management and provide key decision-making tools. In addition, it is intuitive and adaptable to the specific needs of users.

Inventory Management
Technologies: Next JS – Mongo DB
Creation of a web application for inventory management of carbon credits adjusted for a specific company, tracking transactions (purchase/sale), downloads, users and customer data.

Bakery
Technologies: React JS, Node, Mongo, CSS+
E-commerce creation for Pastry Shop, administration panel and web order management (dates, delivery, stripe payments).

ALLCOT GROUP & SM Contenedores
Website creation for business using CMS platform such as WordPress and applying HTML and CSS code for styles required by the client.

E-commerce Food
E-commerce creation for food sales using Shopify CMS platform, code management, small changes using JavaScript adjusted to liquid.
